

ATX UTL — Stats Tracking Sheet

Season 5 · Scorer's guide · Austin Underwater Torpedo League

Player box score

KEY	STAT	WHEN TO CREDIT
G	Goals	Torpedo fully placed in the opponent's goal on a legal play. One value per score (no 2s/3s). Closest to a soccer/hockey goal.
A	Assists	The last completed underwater pass or hand-off that directly leads to a teammate's goal (primary assist). Credit one assist per goal when earned.
S	Steals	Taking the torpedo from the carrier, or forcing an immediate change of possession while they still held it (takeaway). If the carrier already released / turned it over before contact, that is their Turnover — not your Steal.
B	Blocks	Stopping a scoring chance or goal-bound pass (deny entry to goal / cut off a shot). Not every wrap or swim contact — only a clear denial of a look at goal. Steal = take the torpedo; Block = kill the chance.
TO	Turnovers	Possession ends without a shot or goal because of that player: surfacing with the torpedo, errant pass, stripped while carrying, or illegal score attempt (e.g. scoring off a swim-off with no prior pass). Lower is better.
SO	Swim-off wins	Wins the swim-off — first clean underwater possession for your team after the restart buzzer. Hockey faceoff analog. Tracked for possession; not used in Rating.
SH	Shots / scoring chances	A deliberate look at goal: a shot or clear scoring chance (includes goals). Always ≥ Goals. Missed finishes still count as SH. Not used in Rating.
MP	Matches Played	Matches the player appeared in this season. Free agents accrue MP via guest appearances.

Quick rule: Steal vs Block vs Turnover — Steal = you take the torpedo; Block = you deny the chance; Turnover = they lose possession (including surface-with-torpedo).

Team / standings

KEY	MEANING
P	Played — matches completed
W / D / L	Wins (3 pts) · Draws (1 pt) · Losses (0 pts)
GF / GA	Goals For · Goals Against · Goal Difference (GF – GA)

KEY	MEANING
/ GD	
Pts	Ranking total — sort by Pts, then GD, then GF

Rating & season awards

★ **Player rating (1–10)**

Uses core box only: **G, A, S, B, TO** (not SO or SH).

Score = $G \times 3 + A \times 2 + S \times 1.5 + B \times 3 - TO \times 1.5$

Eff = $Score \div (MP + 2)$

Then normalize league Eff onto a 1–10 scale. The +2 prior steadies small samples.

🔥 **Golden Torpedo (offense)**

Goals $\times 2$ + Assists $\times 1$

Highest score wins. Ties break by Goals.

🧤 **Golden Glove (defense)**

Blocks $\times 2$ + Steals $\times 1$

Highest score wins. Ties break by Blocks.
